Experience

One More Game **Seattle, WA**
Data Analyst *Jan 2026 – Aug 2026*

- Contributed to the Steam launch of SWAPMEAT, (100k+ wishlists, 29K+ units sold)
- Pinpointed where players dropped off within their first 2 hours by analyzing 100K+ player sessions with DuckDB (SQL) and Pandas; resulting increased early-game engagement and retention by 11%
- Built a Unity-integrated exporter that pulls live weapon and enemy stats into structured datasets, creating a visual breakdown for balancing 50+ weapons
- Created and recommended 8 shipped community goals based off of player in-game data.

Ironwood Games **Redmond, WA**
Data Analyst (Contract) *Jun 2025 – Aug 2025*

- Analyzed 1M+ transactions across 20 sales and live events using Python (Pandas, Matplotlib) to identify and propose revenue-maximizing discount levels
- Recommended expanded bundling and data-driven sale pricing based on revenue impact by discount tier
- Presented findings and recommendations directly to the CEO and executive team via 30-minute research slideshow

Whitman College Admissions Office **Walla Walla, WA**
Admissions Data Analyst *Sep 2024 – May 2025*

- Analyzed 400K+ purchased prospect records across the recruitment funnel, from initial outreach to application and enrollment, surfacing trends in demographics and conversion rates
- Built visualizations and reports presented to the school's admissions office
- Ranked recruitment sources by performance and recommended a new plan prioritizing the strongest to optimize future recruitment budget spending

Projects

After Hours: Solo Unity 6 (C#) FPS/tower-defense hybrid. Built a per-wave damage-attribution ledger to measure player vs. defense contribution; Utilized A/B testing to balance and adjust enemies and in-game economy. 801 automated tests.

DDEINT: C++ delayed differential equation solver library, developed under Prof. Stratton. Designed a parallel-friendly array data structure that cut runtime by 10x over 216 cells. Co-authored paper submitted to IPDPS 2027.

SkyBlock Mod: Made a Kotlin/Fabric mod for Hypixel SkyBlock that parses live chat and network packets to track a player's in-game economy and profit in real time, with custom UI and a full config system.

Education

Whitman College **Walla Walla, WA**
B.A. in Computer Science, Minor in Data Science, GPA: 3.7 (Major: 3.8) *Expected May 2027*
Coursework: Statistics, Data Science, Linear Algebra, Algorithms, Data Structures

Skills

Languages: Python, SQL, JavaScript, C#, C++, Java, Kotlin

Data: Pandas, NumPy, DuckDB, Matplotlib, Plotly, Jupyter, Statistics

Tools: Git/GitHub, Unity, Claude Code & Agents, VS Code, LaTeX
